* On June 9, 2006, an explosion on a Gaza beach killed 7 civilians and injured 33 others. UNOCHA lists these numbers as disputed. After carrying out an investigation into the incident, Human Rights Watch determined these casualties were the result of a 155mm Israeli artillery shell.

** On November 8, 2006, Israeli artillery killed 19 Palestinian civilians and injured 40 others. Another four civilians, whom Human Rights Watch has added to the total, died from injuries from the strike.
